HIPAA Security Advisory for Small Medical Practices

Reasonable, documented safeguards aligned to HIPAA Security Rule realities.

What this engagement may include

- HIPAA Security Rule posture review and risk analysis support/validation
- Practical safeguards mapped to CIS IG1 and NIST CSF 2.0 outcomes
- Vendor and business associate dependency review
- Incident and breach response readiness considerations

Outcomes leadership can defend

- Defensible documentation and decision-making
- Reduced regulatory and insurance exposure
- Improved readiness for ransomware and operational disruption
